Today, the combination of endless new data sources, cheap computing and new AI techniques is powering fundamental change - it's time to 'raise the bar' in terms of technology. **Artificial Intelligence and Data Science in Trading** is the event for senior management from hedge funds and investment banks to discover how to maximize this opportunity. During this two day event, you will learn from **50 world-class speakers**, from leading asset management companies, academia and technology providers. Technology is a critical competitive differentiator and attending **AI & Data Science in Trading** will allow you to benchmark your business and create a winning strategy.
